1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-13 and 22-34 are, drawn to method / apparatus for processing operable to transform an input into an output signal, classified in class 708, subclass 819.

- II. Claims 14-21 and 35-38 are, drawn to method / apparatus for processing operable to transform an input into an output signal, classified in class 708, subclass 801.

2. The inventions are distinct, each from the other because:

The inventions listed as Groups I and II do not relate to a single general inventive concept because they lack the same or corresponding special technical features for the following reasons: Inventions of Group I and II recite as different combinations which are not connected either design, operation or effect.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
